TECHNICAL SUMMARY

IT student focused on support and systems work. Maintain a small home lab with Windows, Linux, virtualization, and Home Assistant; troubleshoot hardware, networking, and service issues as they come up. Comfortable learning new tools quickly and working through problems methodically. Looking for an entry-level role where hands-on troubleshooting and user support matter.

CERTIFICATES

IT - Information Security Certificate
Morain Park Technical College

May 2026

EDUCATION

MORAINE PARK TECHNICAL COLLEGE

Associate of Applied Science

Information Technology (IT) – Network Specialist

Information Technology (IT) – Cybersecurity Specialist

GPA: 3.93/4.0; Dean's List

Fond Du Lac, WI
Expected May 2027

SKILLS

TECHNICAL SKILLS

- Operating Systems: Windows, Windows Server, macOS, Linux (Ubuntu, Mint, Kali), VirtualBox, VMware Horizon Client, RDS administration
- Command Line: Basic Linux commands, navigation, permissions, PowerShell/Terminal
- Systems & Networking: Active Directory, Group Policy, DNS, DHCP, IP addressing, VPN support, basic routing, Wi-Fi/Ethernet troubleshooting
- Firewalls & Security: Check Point Gaia (rules, NAT, objects, logs, basic VPN), access control, CIA Triad, phishing/malware awareness, safe data handling
- IoT & Automation: IoT device onboarding (Matter, Thread, Zigbee, Wi-Fi), Home Assistant ecosystem experience (device discovery, automation logic, local vs cloud control), basic IoT architecture and security concepts
- Cloud Concepts: IaaS / PaaS / SaaS, public/private/hybrid cloud, basic understanding of AWS, Azure, and GCP
- Troubleshooting: Hardware/software isolation, root cause analysis, peripheral support, performance checks
- Tools & Platforms: Microsoft Office (Outlook, Word), PDF tools, OneDrive, basic Microsoft 365 Admin Center
- Ticketing Systems: SpiceWorks, FlightDeck; intake, routing, prioritization

SOFT SKILLS

- Clear communication in fast-paced environments
- Supporting users and coworkers under pressure
- Prioritizing multiple tasks at once
- Training and guiding team members
- Troubleshooting and isolating issues

PROJECTS

Home Lab

Maintain a home lab running Windows Server, Linux services, and a VM for Home Assistant OS. Configure and troubleshoot networking (DNS, DHCP, IP addressing), USB passthrough, and device onboarding for Zigbee/Thread/Matter. Perform updates, backups, and isolate hardware vs. software issues across virtualized and physical components.

Personal Electronics Modification

Performed full teardown and component replacement inside a compact device, handling ribbon cables and ZIF connectors. Required methodical steps and careful reassembly to avoid damage.

See portfolio for expanded project details.

WORK EXPERIENCE

STAPLES

Print & Marketing Associate

Beaver Dam, WI
Aug 2025 – Present

Handled print, cashier, and shipping tasks with minimal on-shift support

- Printed customer files and adjusted basic settings (file format, paper type, sizing, layout)
- Cleared common printer issues and kept machines running
- Managed incoming print jobs through the store's ticketing system

WALSWORTH

Machine Operator

Ripon, WI
Jan 2023 – Oct 2024

Promoted from Bindery Inspector

- Performed mechanical adjustments and routine maintenance on automated bindery equipment
- Conducted quality checks and pulled samples to verify cuts, alignment, and binding integrity
- Identified root causes of recurring defects and escalated issues when needed
- Coordinated with upstream and downstream operators to maintain consistent workflow

MENARDS

Assistant Department Manager

Beaver Dam, WI
May 2016 – June 2021

Promoted from Sales; worked across Plumbing, Flooring, and Paint

- Acted as department manager during manager's medical leave
- Led daily operations for a team of 5–15 employees
- Scheduled staff and kept workflow on track during peak hours
- Trained new team members and supported development
- Handled customer issues and maintained a professional environment
